

Odirlei Alves

Senior QA Engineer | Desktop, API & Web Automation | Robot Framework, Cypress, Python | AI Applied to QA & DevOps

Indaiatuba - SP, Brazil | dilei.alves@hotmail.com | linkedin.com/in/odirlei-alvesa9b14923 | github.com/Dilei27

Professional Summary

Senior QA Engineer with solid experience in Desktop, API, and Web test automation, working with functional, regression, exploratory, and performance testing in highly complex environments. Specialized in Robot Framework, Cypress, and Python, with strong experience in API automation and Azure DevOps pipeline integration, improving quality, traceability, and process efficiency.

Hands-on experience applying Artificial Intelligence to QA through Large Language Models (LLMs), intelligent agents, and Retrieval-Augmented Generation (RAG) for requirements analysis, test scenario generation, and process automation. Practical experience with k6 performance testing and Playwright web automation. Focused on increasing quality maturity by connecting test engineering, automation, DevOps, and AI to deliver scalable, efficient, value-oriented solutions.

Core Skills

Test Automation	Robot Framework (Sikuli), Cypress, Playwright
Languages & Stack	Python, JavaScript, Java (Basic)
Quality & Testing	Functional Testing, Regression Testing, Exploratory Testing, Performance Testing (k6), Stress Testing, Usability Testing
APIs & Integration	Postman, Insomnia
DevOps & Tools	Azure DevOps (Pipelines, Test Plans), CI/CD
AI & Data	LLMs, Intelligent Agents, RAG, Log Analysis (Datadog, GCP), RabbitMQ
Documentation & Management	Notion, Confluence, Jira, Zephyr, BDD

Languages

- English: Intermediate - technical reading and writing; conversational skills in development

Professional Experience

Globaltec S/A - Senior QA Analyst

May 2023 - Present | Sao Paulo, Brazil

- Technical leadership in test automation for legacy ERP Desktop systems and Web/API applications.
- Implementation and continuous evolution of automation solutions using Robot Framework (Sikuli) and Python.
- API test automation and integration with Azure DevOps pipelines.
- Definition and structuring of QA processes focused on standardization, traceability, and scalability.
- Development of automated solutions for system version updates and management, reducing manual effort and operational risk.
- Application of Artificial Intelligence in QA, including agents for automatic generation of testing tasks from User Stories and the use of LLMs for requirements analysis and test scenario generation.
- Support for performance and load testing using k6.
- Work within an Agile/Scrum environment with structured technical documentation.

Bankme - QA Analyst (Mid-Level)

June 2022 - February 2023

- Functional, regression, exploratory, usability, and stress testing.
- Web and API test automation using Cypress and Postman.
- Event analysis through RabbitMQ and log monitoring with Datadog.
- BDD scenario creation and API validation.
- Test management using Jira, Zephyr, and Confluence.

Blue Service BPM Platform - Junior QA Analyst

May 2021 - June 2022

- Manual Web and Mobile (iOS) testing.
- Exploratory testing and functional validation.
- Technical support to the team and log analysis using GCP.
- Pipeline execution and monitoring.

Education

Universidade Cruzeiro do Sul

Systems Analysis and Development

Completed - 2020 to 2022
